

## Inflation Reduction Act (IRA) 25C Federal Tax Credit

### QUALIFIED PRODUCT LIST / HEAT PUMP FACT SHEET

On August 16, 2022, President Biden signed the Inflation Reduction Act into law, marking the most significant action Congress has taken on clean energy and climate change in the nation's history. Existing and expired energy efficiency tax incentives including Energy Efficient Home Improvement Tax Credit (25C), 179D Deductions and 45L Credits have been expanded significantly.

### Incentives for Homeowners

The IRA includes several tax credits for the installation of high-efficiency residential heating and cooling products. Homeowners can take advantage of the Energy Efficient Home Improvement Tax Credit (25c) and the Home Electrification and Appliance Rebate (HEAR) as many of Fujitsu's inverter heat pump systems qualify (see table on pages 2-4).

#### Energy Efficient Home Improvement Tax Credit (25C)

- § 25C credit available through December 31, 2032.
- Effective January 1, 2023, Federal tax credit to homeowners equal to 30% of installation costs on qualified high efficiency equipment
- On select property placed in service after December 31, 2024, taxpayers must include a "qualified product identification number" to claim the credit
- Starting in 2023 and extended through 2032, increased the tax credit up to \$2,000 for qualified heat pumps

#### Non-Ducted Mini-Split Requirements:

Northern Region:	Southern Region:
<ul style="list-style-type: none"> <li>• SEER2 ≥ 16</li> <li>• EER2 ≥ 9.0</li> <li>• HSPF2 ≥ 9.5</li> <li>• COP @ 5° = 1.75</li> <li>• Capacity Ratio (5° / 47°) ≥ 70%</li> <li>• Or Capacity Ratio (17° / 47°) ≥ 58%</li> </ul>	<ul style="list-style-type: none"> <li>• SEER2 ≥ 16</li> <li>• EER2 ≥ 12</li> <li>• HSPF2 ≥ 9.0</li> </ul>

#### Ducted Mini-Split Requirements:

Northern Region:	Southern Region:
<ul style="list-style-type: none"> <li>• SEER2 ≥ 15.2</li> <li>• EER2 ≥ 10</li> <li>• HSPF2 ≥ 8.1</li> <li>• COP @ 5° ≥ 1.75</li> <li>• Capacity Ratio (5° / 47°) = 70%</li> <li>• Or Capacity Ratio (17° / 47°) ≥ 58%</li> </ul>	<ul style="list-style-type: none"> <li>• SEER2 ≥ 15.2</li> <li>• EER2 ≥ 11.7</li> <li>• HSPF2 ≥ 7.8</li> </ul>

- Equipment must meet or exceed the highest efficiency tier (not including any advanced tier) established by the Consortium for Energy Efficiency (CEE)

The criteria to qualify for credit(s) are not yet finalized by the IRS and the above is subject to change.

#### The Home Electrification and Appliance Rebate (HEAR)

- \$14,000 in direct consumer rebates for families to buy heat pumps or other energy efficient home appliances.

HEAR will be administered by the state with effective dates and funds available varying by state.

- Up to \$8,000 Heat Pump installation rebate for energy star equipment
- Up to \$4,000 electrical panel upgrade rebate
- Up to \$1,600 home insulation & sealing rebate.
- Up to \$2,500 home electrical wiring improvements

Eligibility and the amount of the rebate depends on household income:

For households below 80% of area median income, 100% of the system purchase price qualifies for the rebate.

Moderate Income is specified as 150% above the area median income:

How much money will you get with the Inflation Reduction Act?

Here is a tool to find out:

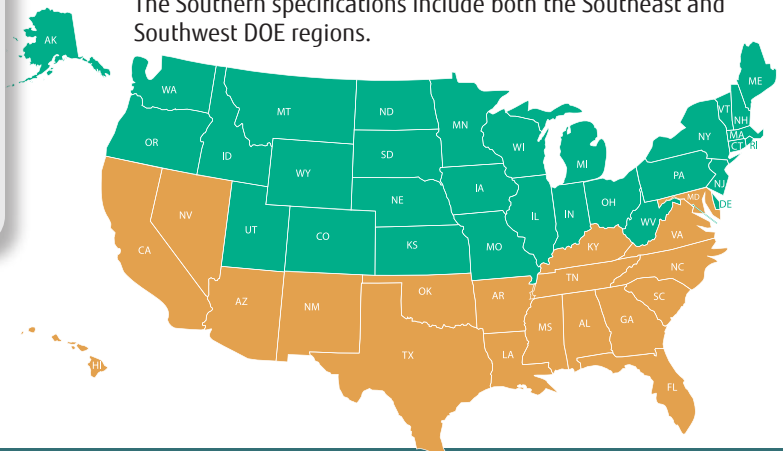

<https://www.rewiringamerica.org/app/ira-calculator>

#### NORTHERN REGION

The Northern specifications include the National DOE region.

#### SOUTHERN REGION

The Southern specifications include both the Southeast and Southwest DOE regions.

## Manufacturer Statement for Air Source Heat Pump 25C Tax Credit Eligibility for the Year 2023

The 25C tax credit, referred to as the “Nonbusiness Energy Property Credit” in the Internal Revenue Code (26 U.S.C. § 25C), is a federal tax incentive designed to encourage homeowners to make energy-efficient improvements to their homes. This credit applies to certain installations and upgrades that meet specific energy-efficiency criteria, with the goal of promoting the use of technologies that reduce energy consumption and environmental impact.

**Claiming the Tax Credit:** To claim the 25C tax credit for eligible air source heat pumps, homeowners must complete IRS Form 5695 and include it with their tax return. Detailed instructions for Form 5695 and more guidance on claiming the tax credit can be found at the following links:

- [IRS Form 5695](#)

- [Instructions for IRS Form 5695](#)

NOTE: Given the complexity of tax laws and the possibility of changes from one tax year to another, it’s recommended to consult the IRS website or a tax professional for the most current information regarding the 25C tax credit and what constitutes “Qualified Energy Property.”

**Qualifying Models:** Please refer to this table to identify the specific models that are eligible. For detailed specifications and to verify the performance of each model, we encourage you to visit the AHRI (Air-Conditioning, Heating, and Refrigeration Institute) directory website: [ahridirectory.org](http://ahridirectory.org)

## Let Fujitsu AIRSTAGE systems be the answer to your heating and cooling needs

- Perfect for whole home, single rooms, additions or renovations
- Quick, easy installation
- Lower energy bills
- Provides both heating and cooling for year-round operation

**Wall Mount** Up to 33.1 SEER2

**Floor Mount** Up to 26 SEER2

**Multi-Position Air Handler** Up to 18.8 SEER2

**Ceiling Cassette** Up to 23.5 SEER2

**Medium Static Ducted** Up to 19.1 SEER2

**Multi-Zone from 2-5 Indoor Units**

**FUJITSU**
